MAGIC COLLECTION

The 20 mm-thick ARMANO stoneware collections are perfect for outdoor use, for covering terraces, staircases, gardens, paths and driveways, as well as walls, steps etc.

Extra-thick porcelain stoneware is the most suitable solution for both outdoor and indoor heavy-traffic floor coverings – such as vehicle spaces in a garage, where it is installed with adhesive – because it is resistant to loads and stresses, waterproof, stain resistant, resistant to chemicals and flame retardant, frostproof, resistant to thermal shock, atmospheric agents and light. From an aesthetic point of view, ARMANO 20mm stoneware tiles offer great scope for customization thanks to collections dedicated to great tactile finishes of stone – and to the range of colours, which encompasses light and dark tones, warm and cold shades of grey, white, black, blue, beige, ivory, crema, brown and many more..
